1 LiPo holder

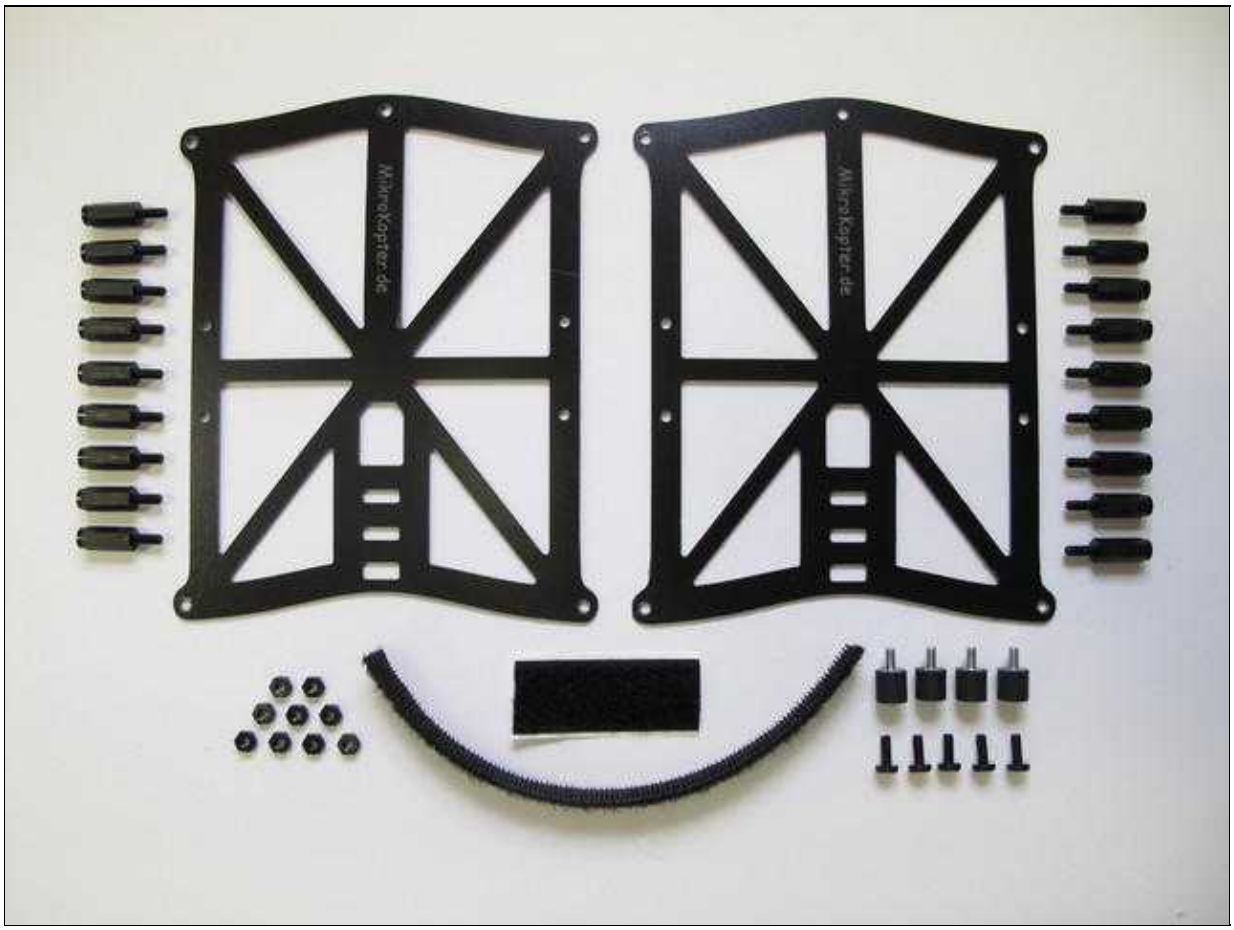

Shop-Link

The Lipoholder can be mounted directly under the centerplate. For this remove the screws of the cap holder. It allows a quick change of the Lipo, a secure fit and protects the Lipo in addition to a crash.
Under the Lipoholder you can mount the Camera holder.

The kit has enough screws, nuts and bolts it to adjust the Lipoholder at different battery levels.

2 Assembly

The material (there is sufficient material included in the set):

First, upper plate:

3 Mounting on the Centerplate

The LiPo holder is fixed with four screws on the center plate. The existing plastic screws or metal bolts (M3x16) can be used for this.
